JPhotoAlbum - functionality

Creating virtual photo albums

Organizing, browsing and commenting

Publishing the results as web pages

XML based data format

Uses XSLT templates – can be modified by user

JPhotoAlbum - background

Current version 1.3.0

Developed by Jari Karjala and Tarja Hakala

GNU General Public Licence, ver. 2

Written in Java, ANT-based

Package size 120 KB, 5052 code lines

JPhotoAlbum - screenshots

The screenshot displays the JPhotoAlbum application window. The title bar reads "[Unsaved] - 1/10 Photos [modified] - JPhotoAlbum". The menu bar includes "File", "Edit", "Page", "View", and "Help". The "Page" menu is open, showing options: "Title...", "Description...", "Keywords...", "Foreground Color...", "Background Color...", "Image Watermark...", "Save as Page Defaults", and "Use Selected Photo as Album Cover".

The main area shows a large photo of a group of about 15 people at a party. The sidebar on the left contains three thumbnails:

- Thumbnail 1: A group of people, labeled "PICT0006.JPG".
- Thumbnail 2: A person in an orange shirt, labeled "PICT0008.JPG".
- Thumbnail 3: A person in an orange shirt, labeled "PICT0009.JPG".
- Thumbnail 4: A person in an orange shirt, labeled "PICT0010.JPG".

The status bar at the bottom shows the file path: "D:\My Pictures\Athens\0226 Polska party\PICT0006.JPG loaded in 266ms." The taskbar at the very bottom includes icons for Start, Mozilla Thunde..., [Unsaved] - 1/10 P..., Microsoft PowerPoint..., Firefox, EN, and the system clock showing 22:38.

JPhotoAlbum - changes

***Export into self executable .jar
slideshow with full-screen subtitled
pictures***

***Correcting some minor features, like
rotation of the thumbnails, etc.***

***Thanx for your
attention***

Any questions?
