Lesson: Advanced Topics in Software Engineering

Project name: jGnash

Project Administrator : Craig Cavanaugh

Team Name: Anonymous plus 2

Member Names: George Paraskevopoulos (A.M. 8030185)
John Georgiou (A.M. 8030013)

Project Summary

Project Summary: jGnash is a cross platform personal finance application written in Java. It covers the basic tasks of setting up accounts and entering transactions. It contains also some advanced features as report generation, scheduled transactions, investing support, charts etc. jGnash is a double entry system with support for multiple currencies. jGnash can import Gnucash and QIF files.

Project Information

Operating System: All 32-bit MS Windows, All POSIX, OS X

Programming Language : Java

License: GNU General Public License (GPL)

Category: Accounting, Investment

Project Information

Development Status : 6 - Mature

Developers : 4

Project size: 8.882KB / 64.642 lines

Translations : English, French, German, Italian, Lithuanian, Portuguese, Russian

Project Information

Registered : 2001-05-14 05:08

CVS Repository : (3,300 commits, 446 adds)
